WeatherXL™ - Coil Coating System

Industry Leading Silicone-Modified Polyester

Valspar's WeatherXL® coating is a unique silicone-modified polyester (SMP) resin system for pre-painted metal products designed especially for the residential, agricultural and commercial construction industry.

This two-coat system has proven durability and is highly resistant to stains, abrasions and metal marking. These outstanding features allow the product to endure the physical stresses of fabrication, transit and construction while minimizing cracking and marring.

The combination of ceramic, inorganic pigments and other enhancements make WeatherXL the most durable SMP coatings on the market. WeatherXL is recognized for its superior weatherability, remarkable color and gloss retention, outstanding color consistency, proven durability, as well as superior chalk resistance.

WeatherXL coatings are available in a wide pallet of colors from bright white to jet black, all of which are available in Solar Reflective (SR) formulations to meet ENERGY STAR and LEED qualifications, which means while looking beautiful, you also save energy and cooling costs.

To learn more about the full range of color and gloss options available from Mill Steel – or to order samples of any color featured on this card – visit www.millsteel.com or call (877) 262-8333.
